## New Screen Magazine

No. 100. ✓

—©CLM 1830—

**N**EW YORKERS live very near some of nature's beauty spots, but they see very little except the skyscrapers in which most of them battle for their daily bread. Forty-five minutes from the city are some exquisite bits of scenery but few New Yorkers know about them.

Living diphtheria germs, cultivated for medical experiments, receive the careful handling due their dangerous nature. A view of the germs, 37,000 times magnified, is shown.

One of the most inventive of American families is the Remington family. Eliphalet Remington 3rd and his son Philo, live at the old homestead near Ilion, New York. A score of inventions are monuments to several generations of Remingtons. At ninety-two, Eliphalet Remington still enjoys a stroll with the family gun. The world's first typewriter, velocipede and steam propelled canal boat were products of the Remington genius. Particularly interesting is the old-fashioned typewriter, created in 1860.

This issue of the magazine closes with an amusing animated by Pat Sullivan entitled "Sammie White presents Hissself in 'Baby Mine.'"
